

Sanibel Sprout LLC
Ms Jianna Senkeleski
2407 Periwinkle Way
Unit 1
Sanibel, FL 33957

Dear Ms. Senkeleski,

Please be advised that the Landlord is in negotiation to lease Unit 3 at Islander Center to a tenant that intends on operating a bike shop that does sales, rental and tours. The City of Sanibel is requiring confirmation from the adjacent tenants that they do not object to this usage in Unit 3. The Landlord believes that this tenant will enhance the Islander Center and that same will have no adverse impact on your rights or usage. Quite the contrary, the Landlord believes that having this tenant will increase the visibility of your business and that of all Islander Center's tenants.

Please kindly reflect your consent to the prospective tenant's intended usage by signing on the line provided for you below:

Paula,

As a full-time Sanibel resident, I strongly oppose bringing any chain e-bike rental business—international or local—to our island. How many times do we need to say no in order to protect our local businesses?

Billy and Sally Kirkland are true Sanibel legends. What they have done for this community, and what they continue to give, deserves our recognition and support. Like so many of us, they lost so much after Hurricane Ian, yet they continue to show up, rebuild, and serve this island with heart and integrity.

I also recognize the other rental agencies on island and they deserve the same considerations.

In my opinion, allowing another rental company to set up shop here would be a disservice and a slap in the face to everything they've worked so hard to preserve.

Best,

Cheri Hollis

I'm told of the upcoming decision regarding additional e-bike rentals that you are taking public input and information.

AZ is considering legislation that requires e-bikes on roadways only, no trails. One group wants to require a valid vehicle license for ebikers. There is now a new crime element, kids on e-bikes knocking over pedestrians, stealing their stuff and riding away so rapidly the victim can't catch them.

At this time the issues surrounding these vehicles are just beginning to be studied from a public safety standpoint. It seems premature to approve the request until more information is collected and considered.

Thanks, Jon and Dianne Olson

We have two great bike rental businesses on Sanibel. We certainly don't need another, especially an international chain rental!!!!

Let us remain the island we truly are meant to be. We started coming 40plus years ago. We now live here.

My children saved all year long to rent bikes here. Fennimores & Billys became their friends. That is what community is

All about!!!

VOTE NO!

Report Suspicious

Dear Sanibel Planning Commissioners,

I am writing as a Sanibel resident and business owner in opposition to the Conditional Use Permit Application submitted for Unlimited Biking, an international formula retail store, to rent 100 eBikes from Unit 3 of the Islander Center on Periwinkle Way.

Five years ago the Planning Commission determined unanimously and unambiguously that the Islander Center was not safe for operation of a bike rental business that would have consisted of 70 non-electric bicycles. Five years later the same applicant is back – acknowledging, this time, that it is a formula retail business – and asking for 150 rental bikes, including some number of e-bikes. Staff this time supports 100 rental bikes at that location, notwithstanding the unanimous safety findings by the Commission five years ago.

1. The Islander Center at 2407 Periwinkle is not a safe location for a steady stream of bicycle renters to test-drive bikes in a small, multi-tenant parking lot, and then to egress/ingress onto the heavily trafficked SUP on Periwinkle Way. It was unanimously deemed unsafe by the Commission five years ago, when this same company applied for a smaller number of bicycles at this same location – and it is no safer today. Indeed, with the addition of faster, heavier electric bikes to that location, it is less safe today.

According to the Final Meeting Minutes of the February 9, 2021 Planning Commission hearing on the matter [at pp 10-11], “Commissioners detailed various concerns, including internal compatibility with other uses on the same site, inadequacy of parking, safety concerns for bicycle renters related to fitting and testing of rental bikes in a parking lot with high traffic flow, [and] safety concerns for bicyclists having to ingress and egress to a business in the middle of a shopping center with restaurants and other businesses with high traffic flow”

These were not passing concerns; these were concerns that Commissioners believed could not be remedied by any changes: Several Commissioners voiced “concerns that the Commission believed

should have made staff not support the request, not being aware of any changes that could be made to make this particular site acceptable for this use, and that enough information had been provided during the hearing and through site visits to make a decision.” [Minutes at p. 12] [emphasis added]

The recent removal from the LDC of the technical parking requirements for commercial properties does not render this location less unsafe for operating a bicycle rental business. The safety findings of the Commission in 2021 related to the nature of a bicycle rental business – which entails customers being fitted for bikes and road-testing bikes in a parking lot; and related to the location of such a business in a cramped parking lot servicing multiple other businesses with high traffic flow – with ingress and egress of bicyclists (many of them inexperienced). These concerns are inherent to that type of business in that specific parking lot no less now than in 2021. (Presently there is no restaurant at that location, but with an existing CUP for a restaurant there presumably will be again.)

The applicant states in its letter to the City of Sanibel that “we expect approximately 65% of our rentals will be delivery-based, serving residential homes, vacation properties, and local hotels.” That leaves a minimal expectation of 35% of its 100 rental bikes that will be serviced in person from the Islander Center.

And it is likely to be a greater in-person rate than 35%. It is noteworthy that of the “16 cities worldwide” locations listed on the applicant’s website, 15 are exactly that: cities. Sanibel is much different geographically and demographically than New York, London, or Paris. There will likely be a greater percentage of walk-ins by Sanibel customers, given the visible location of the Islander Center near the busy intersection of Periwinkle Way and Palm Ridge Rd on a small island.

In addition, much of Unlimited Biking’s website marketing emphasizes its in-person guided tours: “Unlimited Biking has grown to include sixteen cities worldwide, over eighty guided tours, and millions of people choosing to explore with Unlimited Biking”. Guided tours from the Islander Center would add a significant traffic load of cars arriving for tours, and an increased load of bicyclists congregating in that parking lot testing, egressing, and ingressing as part of the tours.

2. Bringing onto Sanibel one of the largest bike rental chains in the country is detrimental to the local bike rental businesses, and is inconsistent with the the Sanibel Plan and the City of Sanibel Mission Statement.

The Sanibel Plan emphasizes the island’s small-town charm and a community living in harmony with the island’s wildlife. In the Plan’s Hierarchy of Values, “Sanibel will serve as attraction only to the extent to which it retains its desired qualities as sanctuary and community.”

The environment and community of Sanibel have been hit with once-a-century threats in recent years. It has been a financial, administrative, and emotional struggle to rebuild our homes and businesses – and for many small business owners, to bear the several-year costs of re-opening into a tourist-driven economy with very few tourists. It has only been in the last few months that we have seen business volumes return to levels near what they were in 2022.

It does not serve our community that while we are struggling to retain our desired qualities as sanctuary and community, Planning Staff is supporting an application by one of the largest bike rental businesses in the country to capitalize on our nearly-rebuilt tourist economy – as part of an application that was unanimously and unambiguously rejected just five years ago as being unsafe at that very location.

The City of Sanibel Mission Statement states that Sanibel stakeholders will "promote economic stability, strengthen community engagement, and provide exceptional services and governance." It does not "promote economic stability" to undermine the island's existing bicycle rental businesses, who have been slowly pulling themselves back up after surviving catastrophic losses. And it does not "strengthen community engagement" to erode the economic foundations of Finnimore's Bikes or Billy's Bikes, who generously support our island's nonprofit sector and community activities, who assisted the community with free bicycles immediately following Hurricane Ian, and who have retained and paid staff these past years to remain open in the midst of a slowly recovering economy.

I am a co-owner of the newest, and smallest, local bike rental company designed primarily to facilitate bikers through the Ding Darling, Captiva, and Bowman's Beach. We are about to launch our new business, having been permitted a total of 20 eBikes at a location well away from the main commercial district. The entry into the field of Unlimited Biking would dramatically and negatively affect our start-up.

3. The consistency and reliability of City interpretation of the Land Development Code is called into question in these circumstances. Although it is true that there is no principle of *stare decisis* with decisions rendered by the Planning Commission, it is also true that there must be some reliable standard of consistent application of the Code – and due respect by Planning Staff to decisions by the Planning Commission. Five years ago the Commission came to a unanimous decision concerning the same applicant at the same location, and unequivocally deemed that location unsafe for a bicycle rental business and incapable of being cured as a safe location for a bicycle rental business. For the Planning Department to nevertheless support this nearly identical application five years later calls into question the finality of Planning Commission decisions interpreting the Land Development Code, and the reliable consistency of applying those interpretations to a nearly identical case.

4. Finally, Sanibel may not be prepared for the sharp increase in Class 2 and Class 3 eBike users on its shared use paths that would come with an international rental chain in the thick of Periwinkle Way. Just two weeks ago City Council decided to move forward an ordinance authorizing Class 2 and Class 3 eBikes on Sanibel's shared use paths. During that Council session it was acknowledged that there would inevitably be a resulting increase of eBikes on the SUP, and an accompanying increase of safety risks to other users of the SUP (pedestrians and other cyclists, particularly older people, children, and pets). But it was felt that there was a greater safety risk in requiring Class 2 and Class 3 eBike cyclists to ride on Sanibel roadways, which do not have sufficient shoulder space to readily accommodate cyclists.

As the City adjusts to an increase in eBike traffic on its SUP, it is important that local bike shops – who are local stakeholders with a vested interest in the safety of our community – demonstrate the concern and responsiveness to the interests of Sanibel residents. Now is not the time to unleash a Big Bang of eBikes on the SUP by situating in the Town Center General one of the country's largest bike rental

operations. A business that implicates public safety is not one that should be entrusted to a national chain business, whose profits and decision-making authority reside elsewhere.

For all these reasons I urge the Commission to vote no to this application.

Sincerely,

—Jeff Blackman—

[Report Suspicious](#)

As a homeowner on the island and a visitor for over 45 years before that, we are opposed to approving the current request to bring 150 more e-bikes on the island.

Our concern is the safety of the many walkers on the trails (small kids and our beloved seniors) and the fact that we already have a large number of bikes. The trails are not wide enough to accommodate motorized vehicles and there would be a greater risk of injury overall. A potential collision between an electric bike - quite heavy machinery - and a regular bike could be catastrophic. SO many people are not wearing helmets!!!

I have ridden an electric bike and they are fun and useful in tougher terrain. However, the speeds can get up to 28 MPH and this is not appropriate for our trails. I don't think the golf carts even go that fast ON THE ROAD!

Thank you for your consideration. We want to retain the simple joys of living and vacationing on Sanibel!

Sincerely,

Celeste and Robert Marsh

[Report Suspicious](#)

Dear Paula McMichael,

As a home owner on Sanibel I would like to express my views on E-bikes on Sanibel and adding more E-bike rentals to the Sanibel environment.

Please- please do not add anymore E-bikes to the Sanibel environment!

As a dedicated biker/walker on the pathways all around Sanibel - I am now avoiding the pathways as much as I can. I have been bumped into, cut in front of and wizzed past by E-bikers going way too fast along side of my family and me when we are on shared use pathways. The speed at which they travel is way above the posted speed and they are aggressive in their movement just because they can and because they have the speed and a "larger bike" they feel they own the pathways.

Yes- there are E-bike people who are considerate and mindful and I appreciate them- But there are many who are not and have little respect. I had a person on a very large mountain type E-bike cut in front of me while driving my car down Periwinkle and zip in and out of traffic. One car almost hit him because there was no regard for traffic and they were on a mission to be daring and had no regard to others. There are mountain pathways for that.

Sanibel is getting back to the old-pre Ian Sanibel and the roads are busy, pathways at times are packed with walkers/bikers/ 4 person bike carts and joggers..... we do not need to add more E-bikes into the mix.

I know we have Rangers on the pathways to control speeds, but I have only seen a Ranger 2 times while out - there needs to be more control over the pathways too during the busy season.

I feel if a visitor to the island rents the E-bike they suddenly feel as if they are the only ones out there and can go as fast as they want with their own agenda because they are on vacation and having fun. That is not the Sanibel Way. The Sanibel Way is respect for others and our environment.

Please do not add more E-bikes to the already crowded pathways of Sanibel.

Thank you,
And please keep us all safe-

Patti Kolster
Proud Sanibel Resident-
1683 Bunting Lane
Sanibel.

Hello Paula McMichael,

I'm not familiar with the details regarding a Facebook post I read regarding an International Bike Rental Company wishing to open an outlet in the Islander Center. However, if this is true, please accept my perspective.

One of the unique characteristics of our island is the focus on small family-owned commercial businesses. I'm very familiar with both Fennimore's and Billy's Bikes, having either rented or purchased services from both. Both companies have supported our community through the good and bad times. Please don't destroy the fabric of what makes Sanibel Island so very special to both residents and tourists!

Dear. Ms. McMichael,

I am writing you to express my doubts about the introduction of more e-bike traffic on Sanibel. This community can barely handle the biking numbers it currently has. The SUP is crammed from sun up to sundown making peddling a chore rather than a pleasure. Adding more traffic consisting of speeding e-bikes will just exacerbate the problem. Please don't allow this menace to increase. There are already typo e-bike rental companies on the island, we can't absorb another one.

Sincerely,

Julia White

Dear Ms. McMichael:

My name is Andrea Kunkel. Our family has been visiting Sanibel multiple times a year for close to 30 years. We are regular bike riders, and our four adult children grew up vacationing and riding bikes on the island. We recently obtained permits to construct a house on Rabbit Road and will commence construction shortly.

Our entire family is extremely opposed both to allowing chain businesses on the island and to allowing or encouraging additional e-bike usage. While we believe e-bikes have a place and can be useful, they also are problematic from a safety perspective and make regular biking, walking, and running on the island much more challenging.

We are all looking forward to finally having our own little home in paradise, and we are troubled that adding chain businesses and more e-bikes will have an irreversible and negative impact on the character of the island. Sanibel is a unique place, and we urge you to vote against permitting this business. Thank you for your attention.

Best regards,
Andrea Kunkel

i just heard about a proposal to allow another bike rental company on the island. It sounds like a large ebike business. we have 2 great rental businesses in town that have served us well and even went above and beyond during and after lan. they have been struggling on the island for years since, so to consider allowing a new big box company to take it over is a mistake since it would further restrict the existing suppliers. And directly goes against the sense of community that Sanibel has always had. so as a property owner i am against it. Art Addie. 2074 Wild Lime Dr. Sanibel

[Report Suspicious](#)

Dear Ms. McMichael:

I am a full-time Sanibel resident. I live on the SUP and I am also an almost daily user. I use a traditional bicycle. In the last two years, there has been an explosion of e-bikes on the path, and it is inevitable that over time a majority of residents will switch to them. It is now MUCH more important to pay very close attention to who is approaching both from the front and the rear, even on my traditional bicycle (and I am sure it is much worse for walkers). Regardless of the rules, e-bikes simply make traffic move faster on the path, and caution and courtesy by many users has gone out the window.

I understand the physical need for some people to have e-bikes, and they are certainly convenient for anyone. Still, they add NO value to the overall "Sanibel vibe" on the SUP. They mainly serve as an alternative for their riders to avoid being backed up in traffic on the roadway.

There is NO WAY we should ever allow for another 150 e-bikes to be added to the SUP. Especially because the main users of those e-bikes would be visitors, that might have less concern about our SUP rules, speed limits, etc. Ideally we would even limit the total number of e-bikes that Billy's and Finnimore's are allowed to rent (but I realize this is probably not realistic).

I am happy to discuss if you have any questions. Thank you for your attention.

Dear Paula,

It would seem unconscionable to permit another bike rental to sanibel , to the detriment of our two existing, wonderful businesses already catering to these needs.

Living in the Bayous, my husband and I very regularly ride San CAP and all over, NOT with E bikes. But this isn't the issue. Billy's have been fabulous with their service and we also patronize Finnimores, both long standing businesses.

We'll always remember the great kindness shown by Billys , GIVING away his Hurricane Ian-ruined stock which was rusty, but very usable. Having felt bereft from 5 1/2 feet of water deluging our new home, this act really showed us what the Sanibel spirit was all about.

Now, if an automotive repair/service business proposed entry onto Sanibel, I could endorse that!

Please continue the excellent vote of 2021 and vote no.

Thank you for your time, but also hope you are inundated with similar messages. 😊
