Subject: Request for TDC Funds: Emergency Erosion Mitigation in the Area Southeast of Blind Pass in the amount of \$25,000

Dear Director Piggott,

As Mayor Kevin Ruane reported during the February TDC meeting significant shoreline erosion has occurred during the recent strong winter fronts in an area southeast of Blind Pass. A copy of his report is attached. Mayor Ruane also reported that we are closely monitoring the erosion to determine if mitigation will be required. As of yesterday have now obtained an Emergency Field Permit from the DEP (attached) as well as obtained a quote from a contractor (attached) to proceed if conditions warrant. At this time we are requesting an allocation in the amount of up to \$25,000 for placing up to 600 cubic yards of beach compatible fill in the affected area. These funds will only be utilized if the emergency mitigation is required. We would access these funds as a reimbursement for actual expenditures.

On a side but related note we received notification from LCEC that this afternoon the work on Pole #1 (as illustrated in the above attachments) changing out the anchor extensions was completed. They remain on schedule to change out Pole #2 (as illustrated above) this Thursday, February 26, 2015.

Please let me know if you need any additional information to proceed with this allocation.

Thank you very much for your efforts to protect & maintain our beaches & shorelines.
